18
rank out of 24
score 1.25

South and Southeast Asia

Takii ranks 18th in the South and Southeast Asia Index. It performs best in Research & Development thanks to its breeding activities in several index countries and its programs to improve many characteristics important for smallholder farmers. The company also has well-established distribution

channels in the region and encouraging programs in Seed Production. However, it underperforms in Capacity Building, Genetic Resources and Governance & Strategy.

Leading practices

- No leading practices were identified.

Areas for improvement

- Takii could improve its commitment to and transparency about smallholder farming as well as about its operations in general.
